Resource Estimation Report Authors

Overall since Oct 2014

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

We have recently adjusted our methodology for producing the above graphs. We now only count a resource author where the resource status is maiden/updated/upgraded. Previously we counted a resource author even if the resource status itself was unchanged.

All commodities converted to AuEq. based on selling prices of \$1,223.70/oz Au, \$25.5/lb U₃O₈ from <https://www.quandl.com/collections/markets/commodities> and <https://www.uxc.com/p/prices/UxCPrices.aspx>

Note: Projects are only listed once in this table to avoid the same project being ranked multiple times.

Note that the intersections reported here are extracted directly from the public reports. No additional verification of true widths or handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.

Probe Metals takes out first place this week with an impressive Au intercept from Val-d'Or East in Canada. UEX Corp. is in second with a nice uranium hit from Christie Lake in Canada and in third place is Kin Mining with a good gold hit from Leonora in Australia.
