Resource Intelligence - Weekly Report Activity

Drilling updates and resource reports both picked up again this week. Resource reports reached a 47-week high due to the release of 2017 year-end resource statements from eight companies.

Announced drilling remained within the range of the last six months.

Resource Estimation Report Authors

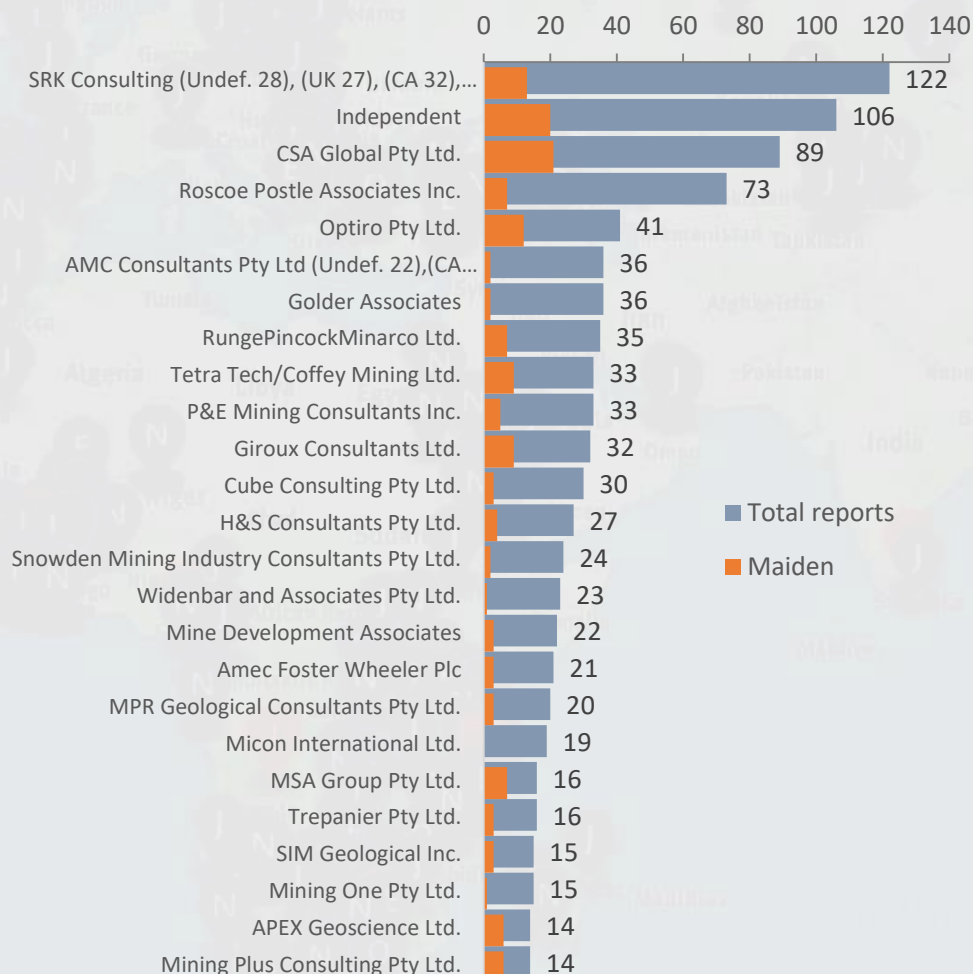

Overall since Oct 2014

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

We have recently adjusted our methodology for producing the above graphs. We now only count a resource author where the resource status is maiden/updated/upgraded. Previously we counted a resource author even if the resource status itself was unchanged.

Note that the intersections reported here are extracted directly from the public reports. No additional verification of true widths or handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.
