Resource Intelligence - Weekly Report Activity

Drilling updates increased to a 21 week high this week, a positive outcome given it isn't due to a post-Christmas holiday catch-up or end of financial year reporting rush.

Announced drilling fell to an 8-week low. Other report types remained range-bound.

Resource Estimation Report Authors

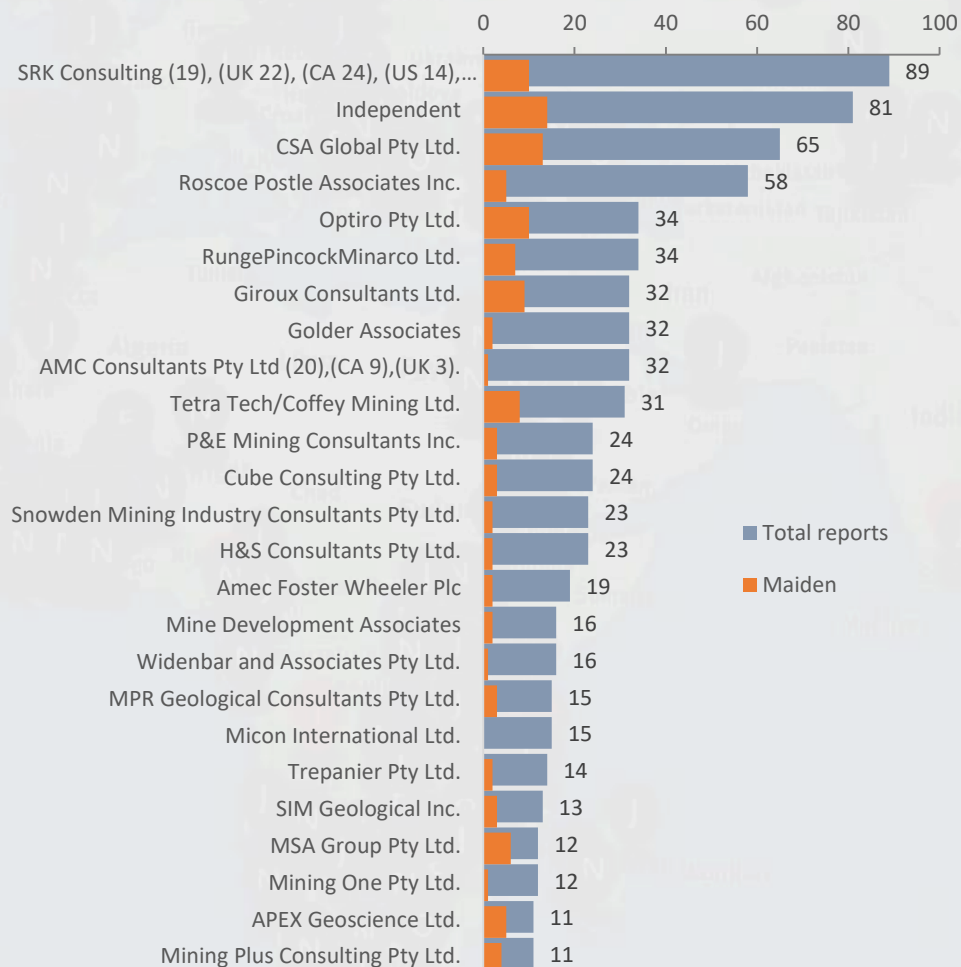

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

We have recently adjusted our methodology for producing the above graphs. We now only count a resource author where the resource status is maiden/updated/upgraded. Previously we counted a resource author even if the resource status itself was unchanged.

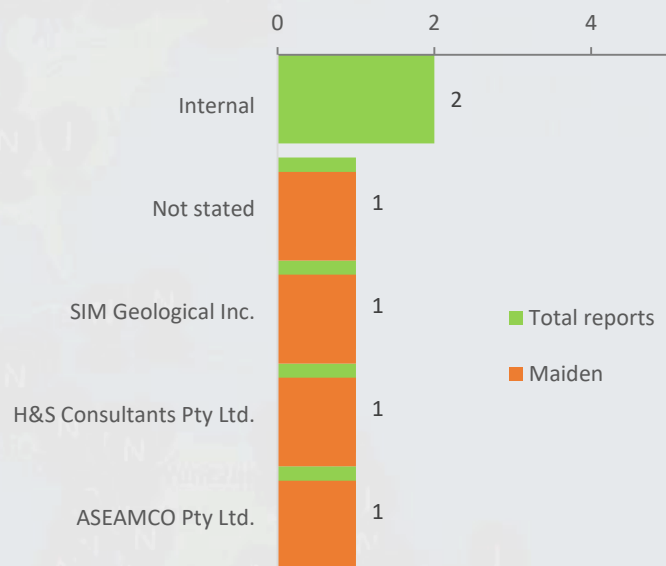

Overall since Oct 2014

8

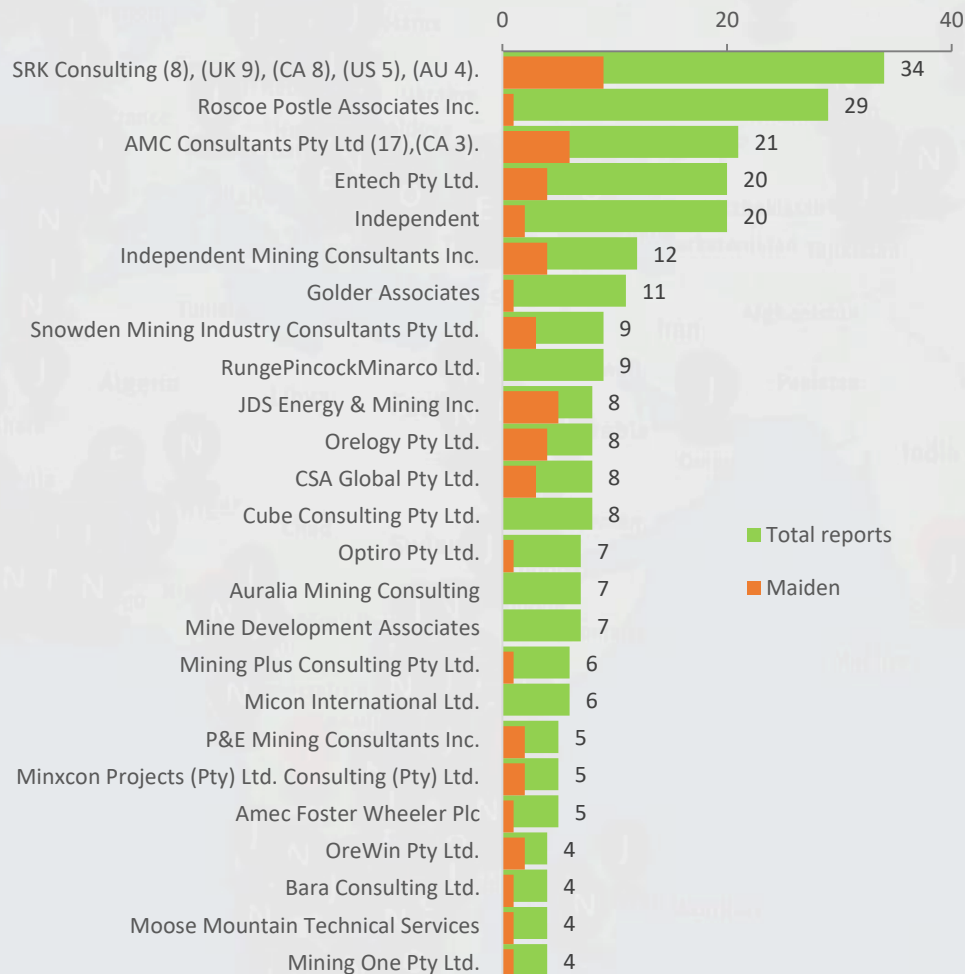

Reserve Estimation Report Authors

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

Note that the intersections reported here are extracted directly from the public reports. No additional verification of true widths or handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.
