Resource Estimation Report Authors

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

We have recently adjusted our methodology for producing the above graphs. We now only count a resource author where the resource status is maiden/updated/upgraded. Previously we counted a resource author even if the resource status itself was unchanged.

Overall since Oct 2014

All commodities converted to AuEq. based on selling prices of \$22.75/lb U₃O₈, \$54,750.00/t Co, \$1,270.50/oz Au, \$5,652.00/t Cu from <https://www.quandl.com/collections/markets/commodities>

Note: Projects are only listed once in this table to avoid the same project being ranked multiple times.

Note that the intersections reported here are extracted directly from the public reports. No additional verification of true widths or handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.

UEX reports the top hit this week with a great uranium intercept from Christie Lake in Canada. Fission Uranium also reports a uranium intercept from Patterson Lake South and takes out second place. Artemis Resources is in third place with a Co-Au-Cu hit from Carlow Castle in Australia.
