

Chistian D'Amours

Education 1981 - 1985 University of Quebec in Montreal

- Bachelor of science in geology, graduated august 1984.
- Post-graduate studies in soils geochemistry

Certificate

- 1996 (5 days) North American Datamine Users, Training workshops.
- 1998 (3 days) Geostatistics for reserves calculations and grade control.
- 1998 (5 days) Training of formative FMS, (modular forming of the superintendents).
- 2001 (3 days) Gemcom for resource evaluation. Gemcom Canada
- 2007 (5 days) Quality Control of Geochemical and Assay Samples. Professional Development Infomine.
- 2008 (5 days) Practical Geostatistics. Professional Development Infomine.
- 2011 (5 days) Geostatistical analysis and ressource estimation. Isatis.
- 2013 (3 days) Quality control in mining expooration. ICM
- 2015 (2.5 days) Key Issues in Geostatistics, Isatis

Professional
experience Since 03/2000 GéoPointCom and Géotic
Consultant

- Setting up and management of two different companies. GéoPointCom is totally dedicated to geostatistic and resources estimation. Géotic is producing and distribute a software package for exploration geologist.
- Establishment and validation of the parameters and the procedures for the evaluation of the mining reserves.
- Validation of geostatisticals parameters.
- Geologic modelling.
- Treatment / transfer of data base and programming.
- Reserves / resources audit and strategic council.

01/1994 - 08/1999 Placer Dôme (Sigma mine and Kiena mine)
Mc Watters (Kiena mine)

Mine geologist

- Follow up day-to-day underground production.
- Underground mapping and core logging.
- Evaluating reserves and geostatistics.
- Team member for economic planning.
- Projects management.

- Geological data processing and programming.
- Evaluation of deposits for potential acquisition and prospect.
- Geologic modelling.
- Supervision of technical staff.

05/1985– 01/1994 Agnico-Eagle Laronde div. (3.7 years)
 Ressources Vald'or (2.7 years)
 Kiwatin (1 year)
 Exploration Brosnor (0.5 year)
 Albarmont (0.6 year)

Exploration geologist

- Mapping and core logging.
- Proposes and manages exploration programs.
- Plans, manages and executes geochemicals soils surveys.
- Participating and introduced to reserves and resources estimation.
- Follow up of an exploration ramp and an open-pit.
- Compilation and interpretation of geologic data set.

Other professional experiences

- Administrator of the Order of Geologists of Quebec.
- Assistant of education university level.
- Education of the techniques of mining prospecting to the adults.
