Resource Estimation Report Authors

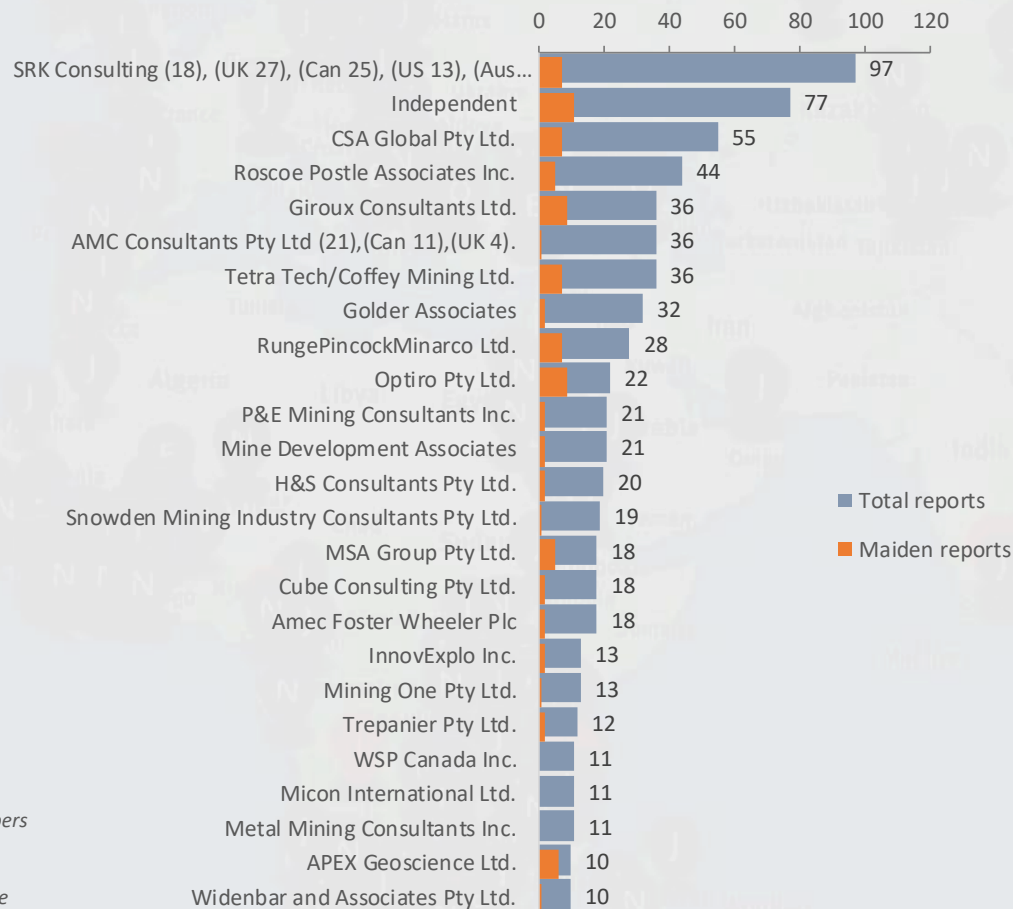

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

The above graphs refer only to the consulting company that produced the mineral resource estimate. Currently other consultancies involved (e.g. Overall report, Reserve, Metallurgy etc) are not included in the above statistics. We are currently working to include all.

Overall since Oct 2014

Note: Projects are only listed once in this table to avoid the same project being ranked multiple times.

Note that the intersections reported here are extracted directly from the public reports. No additional verification on true widths has been carried out. No verification on the handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.

NexGen Energy leads this week with another impressive uranium intercept from Rook 1 in Canada. North River Resources takes second with a good hit from the Namib project in Namibia, and OceanaGold is in third place with a gold hit from the Haile project in the USA.
