WEEKLY BULLETIN:
RSC MINERAL INTELLIGENCE
intel.rscmme.com

Week 49 (03 – 09 December 2018)

2018: Week 49 overview

	Number	Change
New technical reports published	99	
Amended	2	2↓
Clarified	1	1↑
Resource estimation reports	19	2↓
Maiden resources	3	
Exploration/drilling updates	67	2↓
Other monitored reports		
Filed NI43-101 technical reports	2	3↓
Environmental reports	0	1↓
Announced drilling	49	4↑

↑↓ shows increase or decrease compared to last week's reporting

Reports included in this publication are from the public reporting domain, using internationally recognised reporting codes and national instruments such as JORC, SAMREC, NI43-101, PERC and other codes in line with CRIRSCO.

Number of reports by report type

Resource reports were down from last week, drilling updates remained steady. Announced drilling had a slight increase.

4 CORRECTED ANNOUNCEMENTS RELEASED THIS WEEK

company	project	report type	original report release date	share price change*	corrected report release date	share price change*
Base Resources Ltd. (ASX)	Kwale	Resource Estimation	8-Oct-18	↓ -3.5%	3-Dec-18	↑ 2.1%
Nova Minerals Ltd. (ASX)	Estelle	Resource Estimation	3-Dec-18	↑ 2.1%	6-Dec-18	↓ -4.2%
Great Atlantic Resources Corp. (TSX-V)	Golden Promise	Resource Estimation	28-Nov-18	↑ 42.9%	6-Dec-18	↓ -30.0%

**between close of trade the day prior to the announcement and open of trade the day after the announcement date.*

Location	Projects	Change
North America	48	21↑
Oceania	34	5↓
Africa	10	3↓
South America	9	7↓
Europe	2	10↓
Asia	2	
Seabed Resources		

↓↑ shows increase or decrease compared to last week's reporting

SERVICES ON QUOTATION

Please email us your project requirements. You will find our approach very flexible and accommodating. We aim to make the impossible possible—at affordable rates—whilst providing top-quality geologists and excellent outcomes. Throw us into a challenging environment, set us a demanding deadline, and let us do the work for you. Ask us for a reference on our services at any time.

Disclaimer and Compliance Warning:

The information in this weekly bulletin does not qualify as a Public Report as defined by clause 6 of the JORC Code (2012). It is not prepared for the purpose of informing investors or potential investors or their advisors, and is not published for or on behalf of any of the companies mentioned in this bulletin. RSC has no equity or other interest in any of the companies mentioned in this bulletin.

A full list with links to all individual Public Announcements for each company mentioned in this information bulletin is provided through <http://intel.rscmme.com>. RSC takes no responsibility for the compliance of those Public Reports, and it is up to each individual company to make sure that drilling intercepts are reported in a material and transparent manner in compliance with the relevant reporting codes for the respective jurisdiction. For ASX-listed companies, the relevant JORC Code (2012) clauses are 4, 18, 19, and 50. Investors or potential investors using the information in this bulletin are recommended to download the full reports either directly from the company's website or through the links in weekly lists provided by RSC.

Drill intercept grades from week 49 have been converted into AuEq using the following metal prices (USD): \$1,239.25/oz Au, \$14.55/oz Ag \$11,020.00/t Ni, \$6,162.00/t Cu, \$55,250.00/t Co, \$806.00/oz Pt, \$1,235.00/oz Pd sourced from <https://www.quandl.com/collections/markets/commodities>, <https://commoprices.com>, <https://www.uxc.com>, <http://markets.businessinsider.com/commodities> or <http://markets.businessinsider.com/commodities/historical-prices/iron-ore-price>.

The formula used to convert drill intercept grades to gold equivalence using stated metal price is as follows:

$$AuEq(g/t) = \sum_{n=1}^z C_n(g/t) \times \frac{C_n(\$ / g)}{Au(\$ / g)}$$

Where z is the number of listed components (e.g. Au, Ag, Pb, Cu, Zn, Li₂O, Sn, Co etc) and C_n is the nth component in that list.

Gold has been chosen as the metal equivalent for all conversions as it is the most widely-used and best-understood benchmark to determine or appreciate the grade tenor of a drilling intercept.

Monthly and yearly intercept grades were converted to AuEq using metal prices from the week of the public announcement. To view previously used metal prices please see the RSC – Weekly Bulletin from the relevant week.

RSC has not investigated and is not aware of the detail of metallurgical recoveries used in the conversions for each drilling intercept mentioned in this bulletin. It is uncertain that all the elements included in the metal equivalents calculations have a reasonable potential to be recovered and sold. For many projects at the Exploration Results stage mentioned in this information bulletin, metallurgical recovery information may not be available or able to be estimated with reasonable confidence. The reader needs to use reasonable caution to avoid being misled in these instances.
