Resource Estimation Report Authors

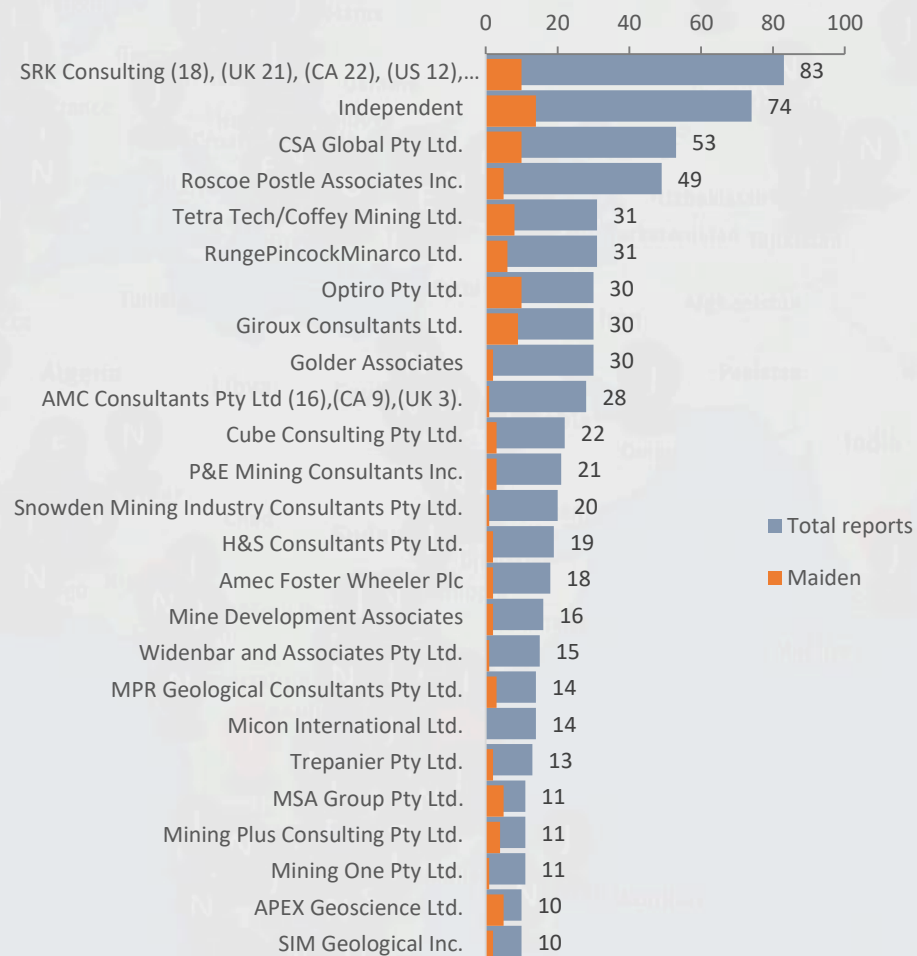

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

We have recently adjusted our methodology for producing the above graphs. We now only count a resource author where the resource status is maiden/updated/upgraded. Previously we counted a resource author even if the resource status itself was unchanged.

Overall since Oct 2014

All commodities converted to AuEq. based on selling prices of \$1,255.70/oz Au from <https://www.quandl.com/collections/markets/commodities> and <https://www.uxc.com/p/prices/UxCPrices.aspx>

Note: Projects are only listed once in this table to avoid the same project being ranked multiple times.

Note that the intersections reported here are extracted directly from the public reports. No additional verification of true widths or handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.

A big week for gold this week! Leagold Mining reports a huge gold hit from Los Filos in Mexico and takes out the top spot. Osisko Mining is in second place with a great gold hit from Windfall Lake in Canada and Newcastle Gold is in third place with a gold intercept from Castle Mountain in the United States.
