## Resource Estimation Report Authors

### This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

The above graphs refer only to the consulting company that produced the mineral resource estimate. Currently other consultancies involved (e.g. Overall report, Reserve, Metallurgy etc) are not included in the above statistics. We are currently working to include all.

### Overall since Oct 2014

All commodities converted to AuEq. based on selling price \$1,284.4/oz Au, \$18.24/Oz Ag, \$4,862.00/t Cu, \$2,443.00/t Zn from <https://www.quandl.com/collections/markets/commodities>

Note: Projects are only listed once in this table to avoid the same project being ranked multiple times.

Note that the intersections reported here are extracted directly from the public reports. No additional verification on true widths has been carried out. No verification on the handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.

**Emmerson Resources** (JV with Evolution Mining) is in first place this week with a massive Au-Ag-Cu intercept from Tennant Creek. **Orca Gold** comes in second with a wide gold intercept from Block 14 in Sudan and in third place is **Unigold** with another wide Au-Ag-Cu-Zn intercept from Neita in Dominique Republic.
