↑↓ shows increase or decrease compared to last week's reporting

3 Trends

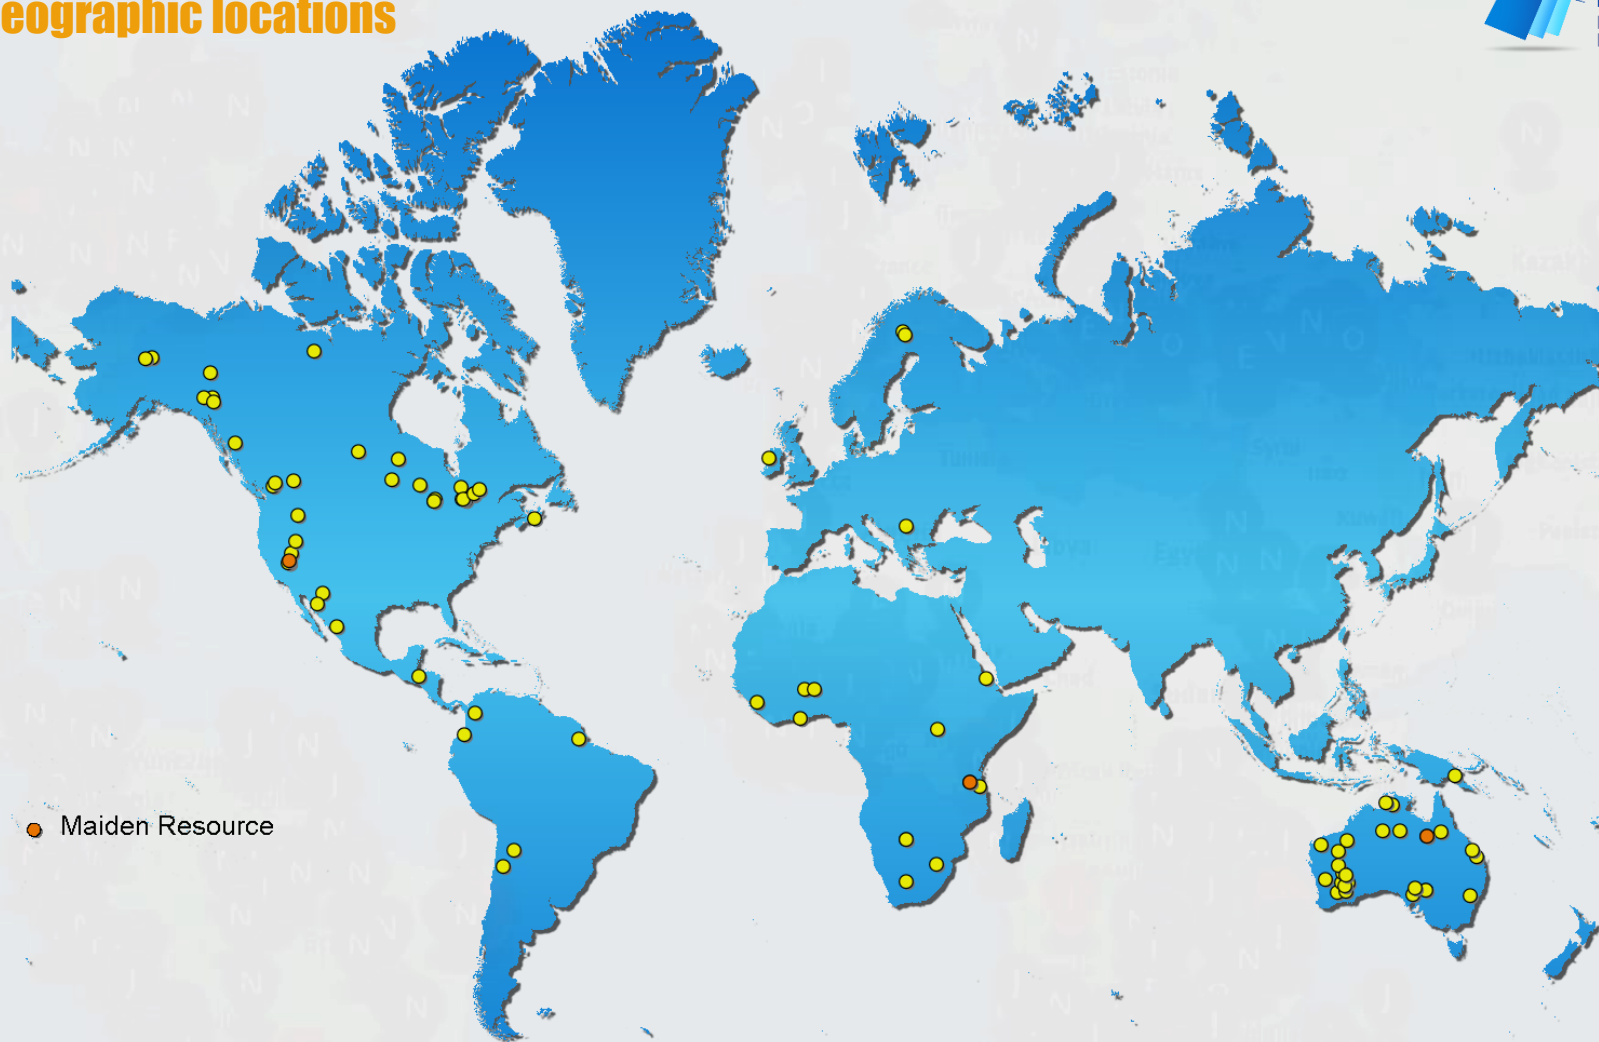

Resource Intelligence - Weekly report activity

The quieter parts of the year are upon us, showing in an overall down-trend for announced drilling, since early October peaks. Exploration updates are still rolling in towards the end of the year, will we see all those expected resource updates starting to kick in the next year?

Resource Estimation Report Authors

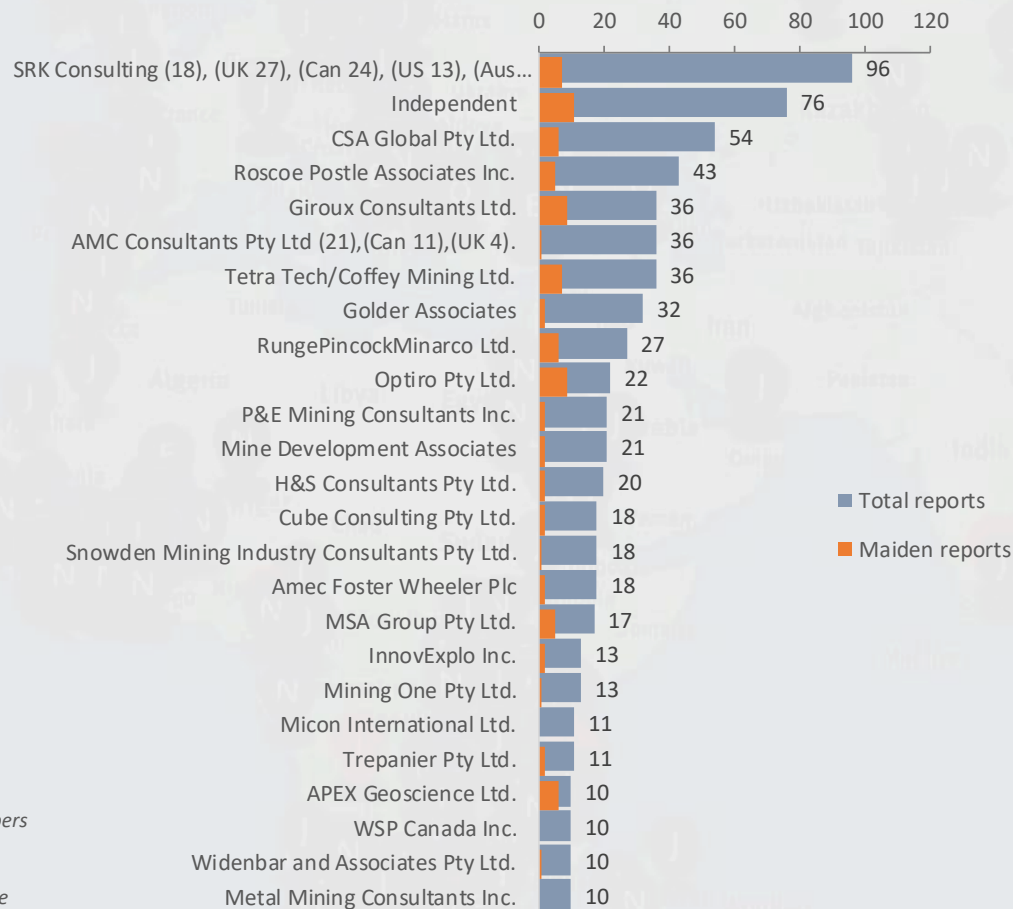

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

The above graphs refer only to the consulting company that produced the mineral resource estimate. Currently other consultancies involved (e.g. Overall report, Reserve, Metallurgy etc) are not included in the above statistics. We are currently working to include all.

Overall since Oct 2014

Note: Projects are only listed once in this table to avoid the same project being ranked multiple times.

Note that the intersections reported here are extracted directly from the public reports. No additional verification on true widths has been carried out. No verification on the handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.

Nevsun Resources continues to intercept spectacular mineralisation at Timok in Serbia and takes out our number one spot this week. Alexco Resource Corp. is in second place with a great hit from Keno Hill in Canada and Osisko Mining takes out third place with an impressive gold intercept from Windfall Lake also in Canada.
