EXPLORATION**

WEEKLY BULLETIN:
RSC MINERAL INTELLIGENCE
intel.rscmme.com

Week 41 (08 – 14 October 2018)

2018: Week 41 overview

	Number	Change
New technical reports published	98	8↑
Amended	1	1↓
Clarified	0	
Resource estimation reports	17	2↑
Maiden resources	2	1↓
Exploration/drilling updates	74	8↑
Other monitored reports		
Filed NI43-101 technical reports	3	1↑
Environmental reports	1	
Announced drilling	37	13↓

↑↓ shows increase or decrease compared to last week's reporting

Reports included in this publication are from the public reporting domain, using internationally recognised reporting codes and national instruments such as JORC, SAMREC, NI43-101, PERC and other codes in line with CRIRSCO.

Number of reports by code

Number of reports by report type

Announced drilling dropped this week to a 36 week low. Both drilling updates and resource reports increased on the previous week.

There were no corrected announcements this week.

Location	Projects	Change
North America	32	2↑
Oceania	46	13↑
Africa	12	2↓
South America	10	
Europe	5	2↑
Asia	1	4↓
Seabed Resources	0	

↓↑ shows increase or decrease compared to last week's reporting

- Reported project
- Maiden Resource
- Maiden Reserve

Map does not include projects mentioned from announced drilling reports.

Up

Copper	9
Nickel	6
Iron	5
Lead	4
Silver	4
Vanadium	4
Lithium	4
Tin	2
Zinc	2
Uranium	2
Aluminium	2
Tantalum	2
Cobalt	2
Ilmenite	2
Silica	2
Gold	1
Palladium	1
Platinum	1
Scandium	1
Potash	1
Antimony	1
Phosphate	1

Down

Graphite	-4
Tungsten	-3
Titanium	-2
Coal	-1
Rare Earth	-1
Bismuth	-1

Top 25 since Oct 2014

This Week

Note: Some reports can contain multiple resource QP's and consulting companies, therefore numbers may not add up to total. Reports are only counted where the resource status is maiden, updated or upgraded.

Top 25 since Oct 2014

This Week

Note: Some reports can contain multiple reserve QP's and consulting companies, therefore numbers may not add up to total. Reports are only counted where the reserve status is maiden, updated or upgraded.

SERVICES ON QUOTATION

Please email us your project requirements. You will find our approach very flexible and accommodating. We aim to make the impossible possible—at affordable rates—whilst providing top-quality geologists and excellent outcomes. Throw us into a challenging environment, set us a demanding deadline, and let us do the work for you. Ask us for a reference on our services at any time.

Disclaimer and Compliance Warning:

The information in this weekly bulletin does not qualify as a Public Report as defined by clause 6 of the JORC Code (2012). It is not prepared for the purpose of informing investors or potential investors or their advisors, and is not published for or on behalf of any of the companies mentioned in this bulletin. RSC has no equity or other interest in any of the companies mentioned in this bulletin.

A full list with links to all individual Public Announcements for each company mentioned in this information bulletin is provided through <http://intel.rscmme.com>. RSC takes no responsibility for the compliance of those Public Reports, and it is up to each individual company to make sure that drilling intercepts are reported in a material and transparent manner in compliance with the relevant reporting codes for the respective jurisdiction. For ASX-listed companies, the relevant JORC Code (2012) clauses are 4, 18, 19, and 50. Investors or potential investors using the information in this bulletin are recommended to download the full reports either directly from the company's website or through the links in weekly lists provided by RSC.

Drill intercept grades from week 41 have been converted into AuEq using the following metal prices (USD): \$1187.40/oz Au, \$14.32/oz Ag, \$6,292.00/t Cu, \$1,914.50/t Pb, \$2,697.00/t Zn, \$12,750.00/t Ni, \$57,500.00/t Co from <https://www.quandl.com/collections/markets/commodities>, <https://commoprices.com>, <https://www.uxc.com> or <http://markets.businessinsider.com/commodities>, <http://markets.businessinsider.com/commodities/historical-prices/iron-ore-price>.

The formula used to convert drill intercept grades to gold equivalence using stated metal price is as follows:

$$AuEq(g/t) = \sum_{n=1}^z C_n(g/t) \times \frac{C_n(\$/g)}{Au(\$/g)}$$

Where z is the number of listed components (e.g. Au, Ag, Pb, Cu, Zn, Li₂O, Sn, Co etc) and C_n is the nth component in that list.

Gold has been chosen as the metal equivalent for all conversions as it is the most widely-used and best-understood benchmark to determine or appreciate the grade tenor of a drilling intercept.

Monthly and yearly intercept grades were converted to AuEq using metal prices from the week of the public announcement. To view previously used metal prices please see the RSC – Weekly Bulletin from the relevant week.

RSC has not investigated and is not aware of the detail of metallurgical recoveries used in the conversions for each drilling intercept mentioned in this bulletin. It is uncertain that all the elements included in the metal equivalents calculations have a reasonable potential to be recovered and sold. For many projects at the Exploration Results stage mentioned in this information bulletin, metallurgical recovery information may not be available or able to be estimated with reasonable confidence. The reader needs to use reasonable caution to avoid being misled in these instances.
