Other Metals

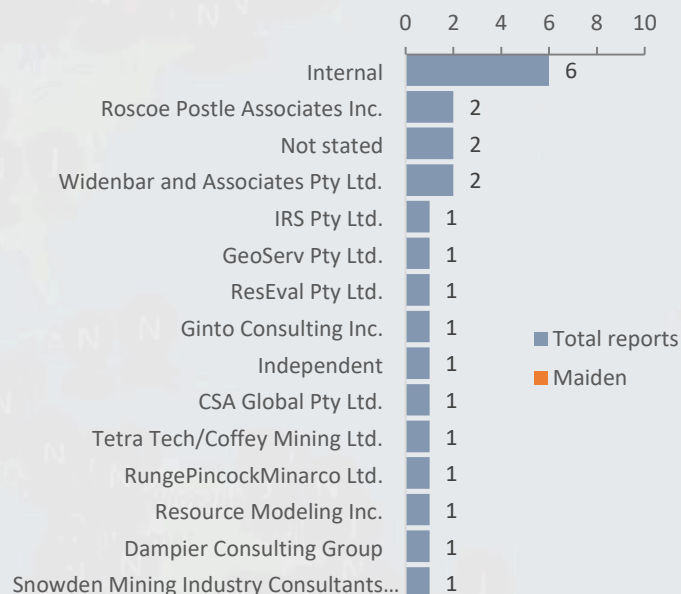

Precious and base metals all show substantial increases from last week's commodity numbers.

Graphs do not include commodities mentioned in announced drilling reports.

6

Resource Estimation Report Authors

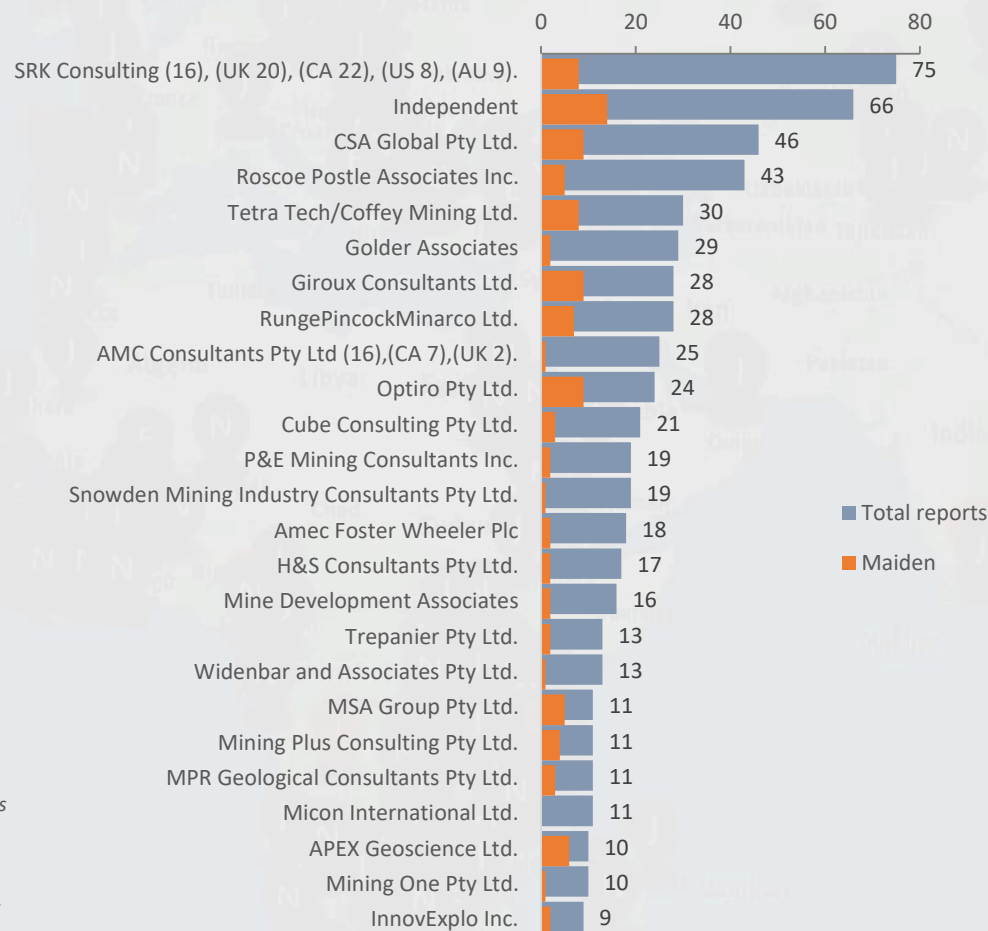

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

We have recently adjusted our methodology for producing the above graphs. We now only count a resource author where the resource status is maiden/updated/upgraded. Previously we counted a resource author even if the resource status itself was unchanged.

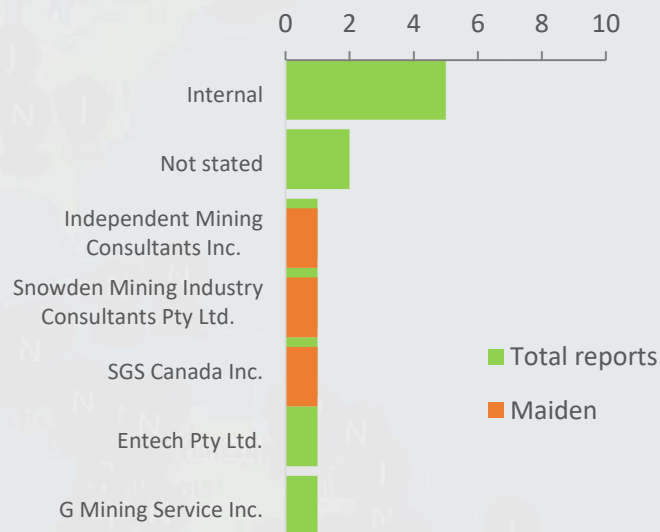

Overall since Oct 2014

7

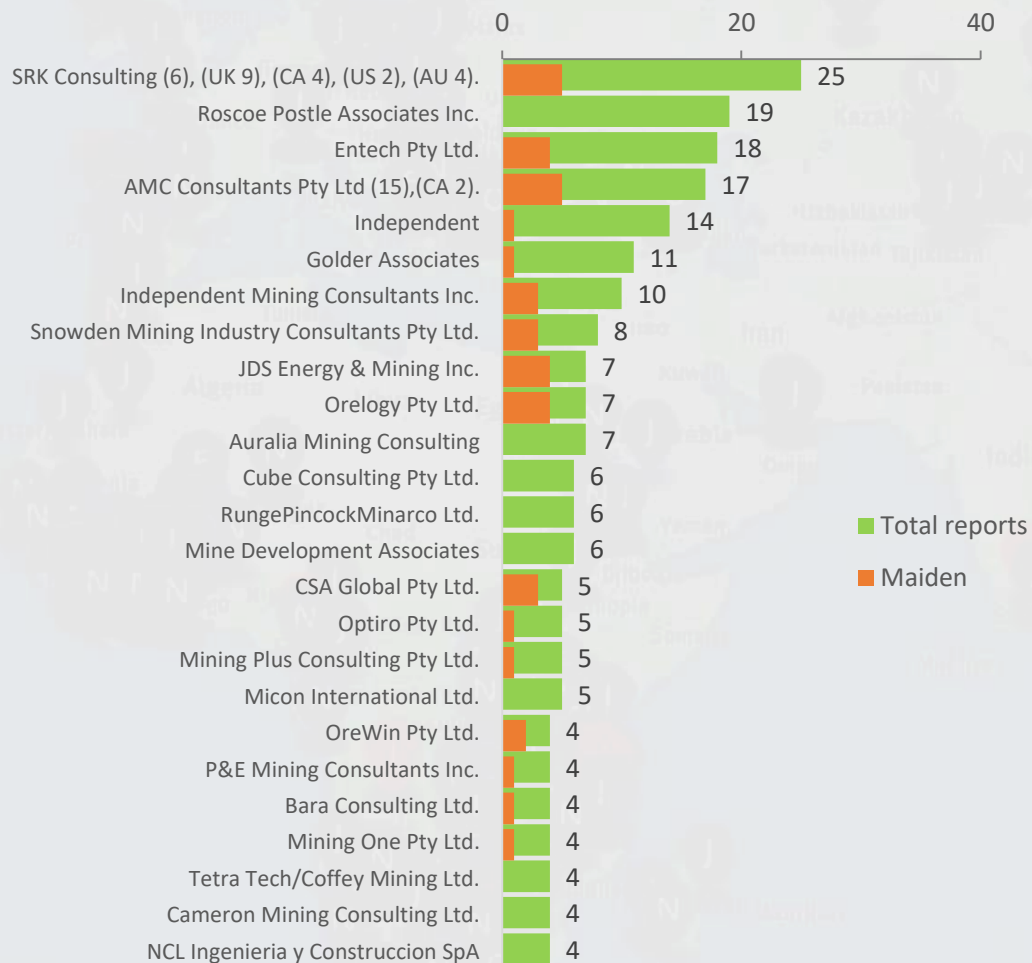

Reserve Estimation Report Authors

This week

Note: Some reports can contain multiple resource QP's and consulting companies so numbers may not add up to total.

Overall since Oct 2014

Note: Projects are only listed once in this table to avoid the same project being ranked multiple times.

Note that the intersections reported here are extracted directly from the public reports. No additional verification of true widths or handling of outliers has been carried out. This listing is based on the assumption that all public reports are presenting information in a transparent and balanced way. If you know that any of the results presented here do not show a transparent and balanced representation of the mineralisation, then please contact us.

UEX leads the way this week with an impressive uranium intercept from Christie Lake in Canada. Arizona Mining is back on the charts this week with another hit from Hermosa in the USA, and SolGold reports a further big intercept from Cascabel in Ecuador.
