

# OUR COMPLIANCE REVIEW SERVICES

Public reporting compliance is a fact of life that listed explorers and miners have to deal with. Given the time pressures most companies are under to inform the market of new results, it goes without saying that an extra pair of eyes looking over a new announcement can be highly beneficial. With just an hour's fatal-flaw review of an Exploration Results or Mineral Resource public report, you can achieve peace of mind, while still allowing your announcement to pack the same sales punch.

Through its Mineral Intelligence project, RSC is uniquely positioned to distinguish the sometimes-fuzzy thresholds of compliance and help its clients publish not only compliant, but professional public reports and accompanying figures. We can make sure that with minimal effort, your public reports pass muster and avoid the embarrassment of being subject to one of several market re-issues that happen each week. RSC is in regular dialogue with JORC, AusIMM, AIG and ASX to discuss the more ambiguous parts of compliance requirements and are in the know on recent developments and changes.

Full reviews, including the fine tuning of JORC Table 1 may require as little as four hours for single-project announcements. RSC provides tracked changes and comments so that you understand specifically which aspects of an announcement are not properly compliant and why.

# OUR OTHER SERVICES

## Geological services

Resource Estimation, Training  
& Courses, QA/QC reviews,  
Laboratory Audits, and more.

## Exploration services

Field Mapping, Project Design,  
Target Generation, Drilling Manage-  
ment, Portable XRF and more.

## Contracting Services

Project Managers, Exploration  
Geologists, Mine Geologists, Field  
technicians, Logistical Managers.

## RSC Mineral Intelligence

Who's drilling what, where?  
We monitor resource develop-  
ment around the world
